DETAILED ACTION

Election/Restriction

Applicant's election **with traverse** of claims **1-11 and 25-30** is acknowledged.

The traversal is on the grounds that 1) the search and examination of the entire application could be performed without serious burden, and 2) that claim 25 is a linking claim and examiner must examine the claims to the non-elected invention that are linked to the elected invention. These grounds are not found persuasive because:

1) The fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

2) Claim 25 discloses a memory that is made based on the method of claim 12, claim 25 should belongs to group II, claims 12-24. The device in claim 25 might not the same as the device in claim 1 since the device in claim 1 might be formed by a method different from the method of claim 12.

The requirement is still deemed proper and is therefore made **FINAL**.

Claim 25 is regrouped to group II, non-elected group, now contains claims 12-25.

Claims 1-11 and 26-30 are present for further examination. Applicants have the right to file a divisional application directed to non-elected claims 12-25.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 26 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Claims 1, 26 are unclear and confuse. How does a first portion of floating gate relate to a second portion of floating gate?? Is the second floating portion on top or parallel to the first floating portion? Are they formed in the same gate stack, formed on the same or different portion of the substrate? How does a floating gate transistor relate to a gate stack? Is the floating gate transistor the same as the floating gate in gate stack?

Claims 2-11 and 27-30 are dependent on the rejected claims and therefore are considered as indefinite.

When responding to the office action, Applicants' are advice to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).
